

Student laboratory assistant for growing biotech company in Copenhagen

Enduro Genetics is a growing biotech company transforming industrial biotech and precision fermentation. We specialize in strain engineering and stabilization to change the scalability of fermentation-based biomanufacturing.

We are looking for an intelligent and motivated student 'assistant to help with laboratory projects incl. preparation of cultivation media and chemical solutions, as well as participation in administrative support to the management.

You are ideally 2-4 years into your university degree within biotechnology or biochemistry. You are organized, a team-player and good at documenting your work. Prior experience with microbial (yeast and/or bacteria) culturing and engineering is an advantage.

We offer an exciting work environment with hands-on experience with microbial production and genetic engineering and an opportunity to grow your talent with a rising company.

Working hours are typically flexible and 7-15 hours per week. Our lab is centrally located at the BII in Copenhagen N.

Please send your CV and cover letter to jobs@enduro.bio or apply through our LinkedIn before October 16th 2022.

We will consider applications before the deadline.
